

LiDAR Car 5.11

No meeting next week

Deliverables

FPGA/LiDAR:

- Verilog module to receive packets from LiDAR to FPGA
- Wire FPGA -> Arduino for data communication

Controls:

- Combine motor_driver and open_space
- Use live packets from LiDAR

Power/CAD:

- First CAD draft

Closing thoughts

- Someone from each team (not the lead) say what you accomplished today and what you want to do next week. 2-3 sentences, so that others can understand
- Bring cardboard if you can!
